

# IT LIFECYCLE SERVICES

# IT LIFECYCLE SERVICES

YKP Systems offers enterprise solutions through the entire IT lifecycle. As a way to make this possible, we partner with enterprises from the intake of new technology, and we see that technology all the way through to its disposal.

Whether you need assistance with the procurement of products for your business, deploying solutions and IT asset management, managing your break/fix support or handling product resale, or efficiently disposing of IT assets, YKP collaborates alongside you to assist you through the entire lifecycle of your IT needs.

To make these IT Lifecycle Services even more convenient for your enterprise, we offer unique depot capabilities, product distribution and repair, bringing these solutions inhouse for you from one of our many nationwide Technology Logistics Centers.

YKP Systems offers IT Solutions for businesses in every phase of IT Procurement, Implementation, Management and Disposal. No matter what type of technology your enterprise is utilizing, YKP can partner with you to optimize the capabilities of your technology, and structure your entire system into a streamlined, high-functioning and scalable process. Whether you procure our onsite or remote services, our offered solutions are all state-of-the-art, and we tailor each plan to fit the project-specific needs of the individual enterprise with which we are working. For every IT Service need, we have the correctly certified personnel, high levels of experience, and the vast resources needed to turn your IT objectives into IT realities.

## IT Procurement

Expanding businesses require an expansion of IT assets; sometimes that can mean the procurement of entirely new technology, others times it simply calls for a refresh of existing technologies.

For the times when expansion calls for the procurement of new technology, YKP Systems offers IT Procurement Services through our My YKP Direct online procurement portal, and also through our dedicated team of product procurement experts. Not only can we assist you with the procurement of new technology, YKP certified professionals also handle the licensing of hardware and software, as well as the resale or disposition of older technology that is no longer needed.

YKP offers a comprehensive product portfolio so your enterprise can select the latest hardware, software, devices and technologies right for your organization. Our focus is to provide each enterprise with the solutions they need to improve end user computer and drive sophisticated infrastructure that enables success of the business rather than becoming an energy draining hassle.

## IT Deployment & Depot Services

The deployment of new technology can be difficult and frustrating, often putting unnecessary drain on a company's resources. Professional oversight of new implementations can not only minimize hassle, but can also save time and money while reducing risks. With the IT Deployment and Depot Services offered through YKP Systems, companies have access to a team of highly certified engineers (e.g. certified in HP, Dell, Lenovo, Apple, and Cisco), ready to assist with all types of operating environments and technologies.

YKP offers assistance through our Technology Logistics Centers as well, providing a necessary base of operations for a wide range of IT services including deployment, repair and advance exchange scenarios, retirement, disposal and crisis management. In our secured depot environments, conveniently located across the country, we keep stocks of inventory on hand, and also serve as break/fix hubs. Through these centers, we offer holistic IT Solutions to our clients across the country.

# In Summary

## IT Asset Management

To thrive, a company must be flexible, able to adapt to circumstances as they change. Optimal utilization of IT assets plays a large role in the flexibility of each enterprise. On a daily basis, companies must maintain, manage and upgrade their IT assets to ensure maximum efficiency and success.

YKP IT Asset Management services provide our clients with the control needed to make the most of their IT assets. Our services run the full gamut of IT Asset Management, including governance, procurement, full asset lifecycle tracking, disposition and reporting, software licensing management, financial planning and vendor management. With complete control of their IT assets, our clients are able to leverage their technological resources as needed to meet business needs on a daily, weekly and yearly basis. Bell offers an end-to-end view of IT Asset Management, and through this lifecycle process, we are able to help each enterprise streamline and automate their IT Asset Lifecycle Management processes, saving money and increasing effectiveness.

## Asset Retirement and Disposal

Every IT asset ultimately reaches the end of its lifecycle, at which point it must be disposed of in a responsible manner. YKP Systems has the resources to ensure that this process is performed in a secure, environmentally safe, low-cost manner. We assist our clients in capitalizing on any residual resale value, by selling, donating and/or auctioning retired hardware. YKP also ensures that all state and federal guidelines are followed while disposing of IT assets.

Additionally we offer asset lease refresh services to restore your computing assets to proper working order before turning them back into the OEM at end of lease.

We offer these Asset Retirement and Disposal services as part of our holistic IT Lifecycle Management solutions. Offering in-house depot services and seeing your technological needs through to the end is a key part of the services accessible to your enterprise through YKP Software.

YKP Systems seeks to offer IT Solutions for businesses in every phase of IT Procurement, Management and Disposal. No matter what type of technology your enterprise is utilizing, YKP can partner with you to optimize the capabilities of your technology, and structure your entire system into a streamlined, high-functioning department.

Whether you procure our onsite or remote services, our offered solutions are all state-of-the-art, and we tailor each plan to fit the project-specific needs of the individual enterprise with which we are working. For every IT Service need, we have the correctly certified personnel, high levels of experience, and the vast resources needed to turn your IT objectives into IT realities.

YKP Systems IT lifecycle services enable you to become as efficient and effective as possible.
