SharePoint Online

Your intranet – but better.

Empower your business and teams to share and seamlessly collaborate with files, knowledge and applications and streamline processes.

Transform your business processes and engage your staff with SharePoint Online. For many businesses, working collaboratively and sharing files has long been a time consuming and frustrating activity. Saving umpteen iterations of a single file certainly doesn't scream efficiency.

Sharing with colleagues, third party partners and customers has never been easier. By moving your file server to the cloud, you can unshackle your business from being held back by a file server. Finally, working on the same file at the same time is possible!

- Share and collaborate with partners, staff & customers

- Improve business processes

- Secure files and folders

- Manage all business apps in a centralised platform

- Enjoy the freedom and power of the cloud!

Achieve greatness with YKP Systems and SharePoint.

We help you achieve efficiency by integrating all your Microsoft tools into a single platform via SharePoint. Working efficiently has never been easier!

Effortless sharing & collaboration

Overcome information miscommunication with dynamic and fit for purpose team sites for every team, department and division in your company. Not only can you seamlessly share files, but news, resources and updates can also be shared. Secure collaboration between team members, partners and customers can be done across all devices.

Insights and team engagement

With the SharePoint intranet, employees can be kept updated on all the latest news and events on internal sites. Tell your company's story and keep team members in the loop with personalised news in SharePoint home.

Get the most from collective knowledge

Finding what you're looking is now just a click away. SharePoint harnesses powerful search and intelligent information discovery tools to help you make the right decisions. YKP Systems has an extensive content management system, meaning your business can use collective knowledge to the max.

Advance your business processes

Revolutionise your business processes through SharePoint, and boost organisation-wide productivity. Automate business processes to gather and manage data, automate repetitive tasks, integrate data sources and services and build custom apps to transform your business.
