

IT SUPPORT SERVICE

Focus more on your customers –
and less on your IT Performance

Overview

YKP Systems provides high level, cross platform IT solutions to clients so as to enable them to have access to accurate, relevant and prompt Information that is necessary for survival in today's competitive world.

We offer World-class IT infrastructure Support and Maintenance, as a product of dedication, experience and knowledge with a focus on customer satisfaction. YKP Systems brings this level of support to our customers, and our clients expect and receive nothing less than the most comprehensive, best of breed services.

The ICT services offered are :

HARDWARE SUPPORT

Hardware Maintenance offers a range of customizable hardware support services for multivendor systems to help you resolve hardware issues quickly and convenient.

SOFTWARE SUPPORT

Software-related problems can really slow down a business—not to mention tie up IT staff. We provide a service portfolio that offers comprehensive software technical support, including individual problem fixes and product usage advice, for virtually all of your software products.

NETWORK INFRASTRUCTURE SUPPORT

At YKP Systems we understand our clients' needs irrespective of size, be they Small, MidMarket or Large Enterprise business. In a world where connectivity is key to reaching resources such as markets, intelligence, polls and research, being offline is not an option. Connectivity is the backbone to communication and transformation of ideas into action.

IT AUDIT & CONSULTANCY

In order to succeed in today's businesses, deploying information technology is one of the various efficient and effective ways in achieving this objective. Therefore, it is important to identify the security loopholes and irregularities or signs of suspicious activities before they actually matter.

HELP DESK SUPPORT

YKP Systems has a dedicated help desk that is always on stand-by to offer support and troubleshooting via phone and/or email to clients and also try to resolve the problem with remote management tools.

- 4. Database Audit and Redesign
- 5. Field Work, Data Collection and Maintenance
- 6. Data Collation, Data Analysis and Data Cleansing
- 7. Business as Usual and Documentation

IT Services

HELP DESK SUPPORT

HELP DESK SUPPORT

YKP Systems has a dedicated help desk that is always on stand-by to offer support and troubleshooting via phone and/or email to clients and also try to resolve the problem with remote management tools.

We have skill and experience, to tailor Managed Helpdesk Services to a client's requirement. We negate risk and ensure system uptime by responding to issues with best-practice procedures, drawing on our extensive technical competencies and strong partner relationships. We deliver on the trust our clients place in us to solve their problems their way, but with our people

Services of a Help desk:

- 1. The IT help desk provides a centralized location to deal with technical issues.
- 2. An IT help desk automatically issues unique tickets number for identification and tracking.
- 3. The IT help desk can create a historical log of all the different problems they encounter at the company. This documentation can then be used as a reference point if the issue should pop up again, since they'll know how the problem was resolved.
- 4. The IT help desk can use the information they gather on a daily basis to run performance reports. These can then show which computer systems and pieces of hardware are consistently experiencing bottleneck issues.
- 5. The staff of an IT help desk can be trained on a common set of procedures. This provides a systematic approach for when they have to handle technical issues – they'll start with the most common solution, and move on from there.
- 6. Service level agreement; it can often be difficult to accurately judge job performance. An IT help desk can manage this issue by sending out automatic surveys after an issue is concluded. If the IT staff took too long to solve the problem or behaved in an unprofessional manner, the survey will reflect that.
